DriverPass System Analysis

Tim Vue

System Requirements

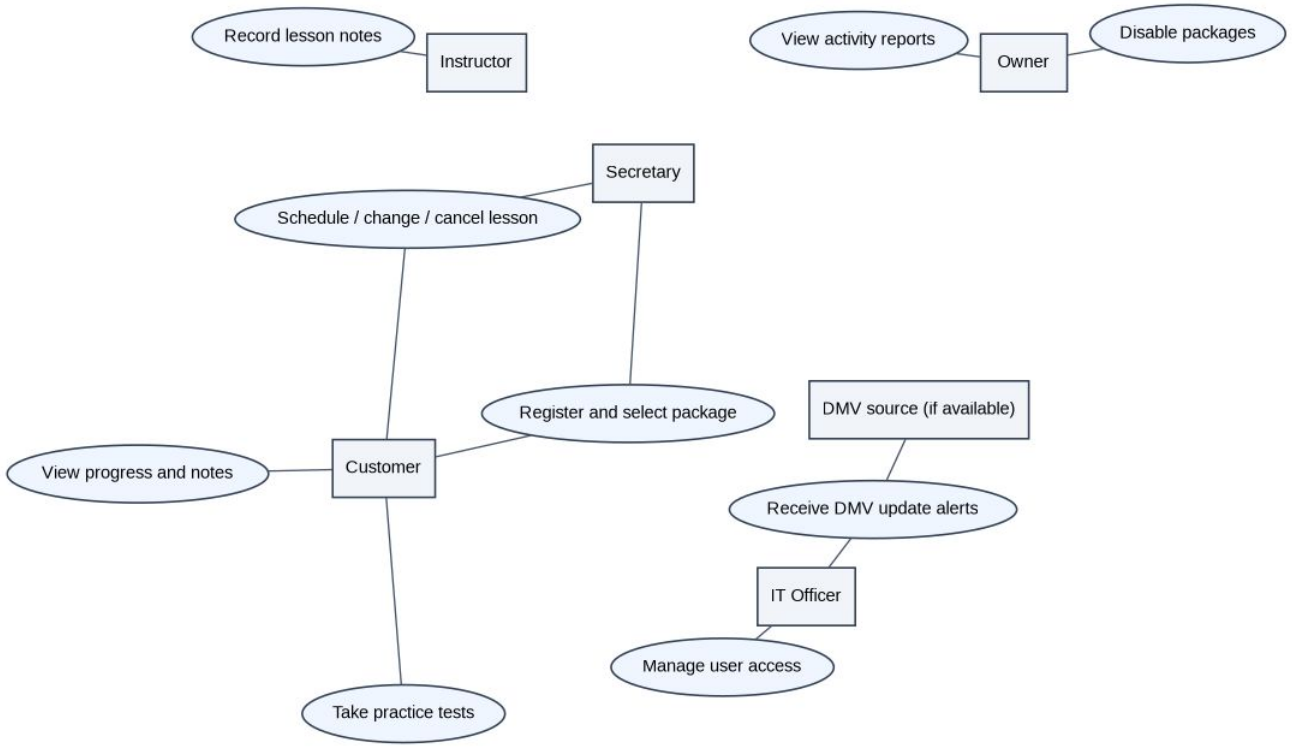

Functional Requirements:

- Customers can schedule, modify, and cancel driving lessons.
- Customers can access online courses and practice tests.

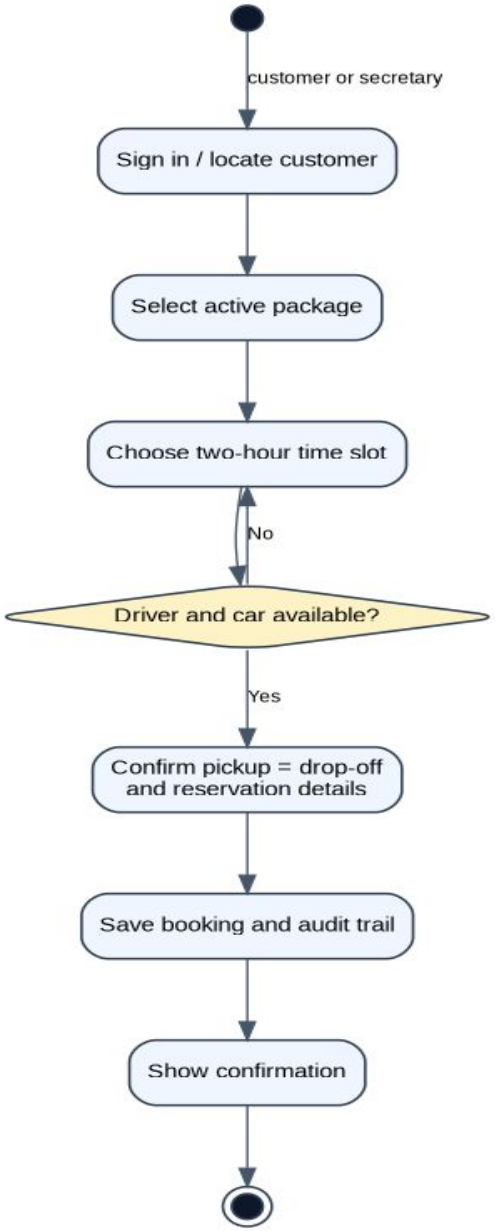

Non-functional Requirements:

- Accessible through web browsers on computers and mobile devices.
- Secure login and protection of customer information.

Use Case Diagram

Activity Diagram

Security

- Secure sign-in and password recovery
- Different access for customers and employees
- Encrypted connections and payment-provider protection
- Track reservation changes and disable accounts

System Limitations

- Internet required for changes
- New package modules require future development
- DMV updates depend on external data availability
- Hosting and service targets still need agreement
